Author Index

Acosta, D., see Páez-Mozo, E. 251
Alvila, L., Pursiainen, J., Kiviaho, J., Pakkanen, T.A. and Krause, O.
$Ru_3(CO)_{12}$/2,2′-bipyridine supported on inorganic carriers as 1-hexene hydroformylation catalysts 335
Annila, A., see Toba, M. 277
Apesteguía, C.R., see Di Cosimo, J.I. 369
Audry, F., see Ivanov, V.A. 45
Bachelier, J., see Ivanov, V.A. 45
Barbier, J., see Montassier, C. 119
Barbier, J., see Montassier, C. 107
Bartók, M., see Török, B. 61
Bechgaard, K., see Kulys, J. 407
Ben Taleb, A., see Jenner, G. 31
Ben Taleb, A. and Jenner, G.
Synthesis of aminoarenes in homogeneously catalyzed nitroarene – methyl formate reactions 149
Bhanage, B.M., see Divekar, S.S. L1
Bhatt, K.N. and Halligudi, S.B.
Hydroformylation of allyl alcohol catalysed by $(Rh(PPh_3)_3)^+$/montmorillonite: a kinetic study 187
Blom, R., Follestad, A. and Noel, O.
Kinetics of chain transfer during ethylene polymerization with chromium oxide/silica catalyst 237
Breslow, R.
Bifunctional acid–base catalysis by imidazole groups in enzyme mimics 161
Buch-Rasmussen, T., see Kulys, J. 407
Butler, P.A.G., see O'Connor, C.J. 303
Caporusso, A.M., see Polizzi, C. 83
Cavell, R.G., see Law, D.J. 175
Chaudhari, R.V., see Divekar, S.S. L1
Chaudhari, R.V., see Rode, C.V. 195
Christensen, J.B., see Kulys, J. 407
Cleverly, D.R., see O'Connor, C.J. 303
Cvengrošová, Z., see Hronec, M. 343
Delmon, B., see Páez-Mozo, E. 251
Deshpande, R.M., see Divekar, S.S. L1
Di Cosimo, J.I. and Apesteguía, C.R.
Use of the methanol decomposition reaction for identifying surface species in Cu/Co-based catalysts 369
Didillon, B., see Montassier, C. 107
Didillon, B., see Montassier, C. 119
Divekar, S.S., Bhanage, B.M., Deshpande, R.M., Gholap, R.V. and Chaudhari, R.V.
Selectivity in hydroformylation of 1-decene by homogeneous catalysis L1
Dominguez, J.M., see Montassier, C. 107
Dziembaj, R., see Makowski, W. 353
Elizarova, G.L., see Filatov, M.J. 71
Filatov, M.J., Elizarova, G.L., Gerasimov, O.V., Zhidomirov, G.M. and Parmon, V.N.
Quantum-chemical study of the four-electron catalytic oxidation of water to dioxygen in the presence of dinuclear and tetranuclear hydroxide complexes of cobalt(III) and iron(III): intermediates of the catalytic cycle and their relative energies 71
Follestad, A., see Blom, R. 237
Fu, Z.-H. and Ono, Y.
Synthesis of methyl *N*-phenyl carbamate by methoxycarbonylation of aniline with dimethyl carbonate using Pb compounds as catalysts 399
Gabriunas, N., see Páez-Mozo, E. 251
Gerasimov, O.V., see Filatov, M.J. 71
Gholap, R.V., see Divekar, S.S. L1
Granger, P., see Montassier, C. 119
Graziani, M., see Rocchini, E. L313
Gupta, N.M., see Shashikala, K. 223
Gupte, S.P., see Rode, C.V. 195
Halligudi, S.B., see Bhatt, K.N. 187
Hansen, H.E., see Kulys, J. 407
Harustiak, M., see Macho, V. 155
Hayashi, H., Sugiyama, S., Katayama, Y., Kawashiro, K. and Shigemoto, N.
An alloy phase of Pd_3Pb and the activity of Pb/Pd/C catalysts in the liquid-phase oxidation of sodium lactate to pyruvate 129
Holotík, Š., see Hronec, M. 343
Hronec, M., Cvengrošová, Z. and Holotík, Š.
Is metallic palladium formed in Wacker oxidation of alkenes? 343
Hu, W.-D., see Jia, C.-G. 139

Huang, M.-Y., see Jia, C.-G. 139
Ivanov, V.A., Bachelier, J., Audry, F. and Lavalley, J.C.
Study of the Meerwein–Pondorff–Verley reaction between ethanol and acetone on various metal oxides 45
Jenner, G. and Ben Taleb, A.
Ruthenium catalyzed ethylene–methyl formate reactions. Synthesis of propanol and ketones 31
Jenner, G., see Ben Taleb, A. 149
Jia, C.-G., Jing, F.-Y., Hu, W.-D., Huang, M.-Y. and Jiang, Y.-Y.
Liquid-phase oxidation of alcohols by dioxygen using oxide-supported platinum catalysts 139
Jiang, Y.-Y., see Jia, C.-G. 139
Jing, F.-Y., see Jia, C.-G. 139
Johnson, K.H., see Smit, T.S. 207
Kamble, V.S., see Shashikala, K. 223
Katayama, Y., see Hayashi, H. 129
Kawashiro, K., see Hayashi, H. 129
Kazlauskaite, J., see Kulys, J. 407
Khan, M.A., see Yang, H. 319
Kiviaho, J., see Alvila, L. 335
Komppa, V., see Toba, M. 277
Krause, O., see Alvila, L. 335
Kulys, J., Buch-Rasmussen, T., Bechgaard, K., Razumas, V., Kazlauskaite, J., Marcinkeviciene, J., Christensen, J.B. and Hansen, H.E.
Study of the new electron transfer mediators in glucose oxidase catalysis 407
Lahtinen, J. and Somorjai, G.A.
Role of readsorption during CO hydrogenation over cobalt model catalysts 387
Lapidus, A.L., see Rode, C.V. 195
Lavalley, J.C., see Ivanov, V.A. 45
Law, D.J. and Cavell, R.G.
Homogeneous hydrogenation of olefins catalyzed by rhodium(I) complexes of new heterodifunctional phosphorus–nitrogen chelating ligands 175
Macho, V. and Harustiak, M.
New catalytic system for oxidative carbonylation of aniline 155
Maeda, K., see Toba, M. 277
Maetz, Ph. and Touroude, R.
Mechanism of but-1-yne hydrogenation on platinum catalysts: deuterium tracer study. 259
Maggi, R., see Páez-Mozo, E. 251
Makowski, W. and Dziembaj, R.
Fast and slow methanation pathways in hydrogenation of carbon dioxide on Fe–Mn oxide catalysts 353
Marcinkeviciene, J., see Kulys, J. 407
Markel, E.J., see Osbaldiston, R.J.C. 91
Ménézo, J.C., see Montassier, C. 107
Ménézo, J.C., see Montassier, C. 119
Minamoto, Y., see Ohkubo, K. 7
Mizukami, F., see Toba, M. 277
Molnár, Á., see Török, B. 61
Moloy, K.G.
Evidence for intrinsically distinct active sites on rhenium-based metathesis catalysts. Norbornene metathesis with Re_2O_7/Al_2O_3 291
Montassier, C., Ménézo, J.C., Naja, J., Granger, P., Barbier, J., Sarrazin, P. and Didillon, B.
Polyol conversion into furanic derivatives on bimetallic catalysts; nature of the catalytic sites 119
Montassier, C., Ménézo, J.C., Naja, J., Barbier, J., Dominguez, J.M., Sarrazin, P. and Didillon, B.
Preparation and characterization of copper based bimetallic catalysts 107
Mukherjee, D.K., Palit, B.K. and Saha, C.R.
Orthometalated ruthenium-complex-catalysed reductive carbonylation of nitroaromatics 19
Naja, J., see Montassier, C. 107
Naja, J., see Montassier, C. 119
Nicholas, K.M., see Yang, H. 319
Niwa, S., see Toba, M. 277
Noel, O., see Blom, R. 237
O'Connor, C.J., Cleverly, D.R. and Butler, P.A.G.
Bile-salt-stimulated human milk lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl] glycerol: solvent isotope effect 303
Ohkubo, K., Sagawa, T. and Minamoto, Y.
Stereoselective oxidation of enantiomeric amines by a monoamine oxidase model of chiral iron(III) porphyrins 7
Ono, Y., see Fu, Z.-H. 399
Osbaldiston, R.J.C. and Markel, E.J.
Thiophene desulfurization by Co/carbon catalysts synthesized by reaction of $Co(C_5H_5)_2$ and the carbon support 91
Páez-Mozo, E., Gabriunas, N., Maggi, R., Acosta, D., Ruiz, P. and Delmon, B.
Selective olefin oxidation with cobalt phthalocyanine encapsulated in Y-zeolite 251
Pakkanen, T.A., see Alvila, L. 335
Pálinkó, I., see Török, B. 61
Palit, B.K., see Mukherjee, D.K. 19
Parmon, V.N., see Filatov, M.J. 71
Pasero, M., see Polizzi, C. 83
Pirozhkov, C.D., see Rode, C.V. 195
Polizzi, C., Caporusso, A.M., Vitulli, G., Salvadori, P. and Pasero, M.
Supported platinum atoms derived catalysts in the hydrosilylation of unsaturated substrates 83
Pursiainen, J., see Alvila, L. 335
Raj, P., see Shashikala, K. 223
Razumas, V., see Kulys, J. 407

Rocchini, E., Spogliarich, R. and Graziani, M.
Catalytic hydrogenation of aromatic ketones in the presence of cyclodextrins L313
Rode, C.V., Gupte, S.P., Chaudhari, R.V., Pirozhkov, C.D. and Lapidus, A.L.
Activity and selectivity of supported Rh complex catalyst in carbonylation of nitrobenzene 195
Ruiz, P., see Páez-Mozo, E. 251
Sagawa, T., see Ohkubo, K. 7
Saha, C.R., see Mukherjee, D.K. 19
Salvadori, P., see Polizzi, C. 83
Sano, T., see Toba, M. 277
Sarrazin, P., see Montassier, C. 107
Sarrazin, P., see Montassier, C. 119
Sathyamoorthy, A., see Shashikala, K. 223
Shashikala, K., Gupta, N.M., Suryanarayana, P., Sathyamoorthy, A., Kamble, V.S. and Raj, P.
Role of hydride phases in the catalytic activity of Zr_2Ni for the dehydrogenation of methanol 223
Shigemoto, N., see Hayashi, H. 129
Smit, T.S. and Johnson, K.H.
The importance of sulphur–sulphur bonding in the hydrodesulphurization process of thiophene, using transition metal sulphide catalysts 207
Somorjai, G.A., see Lahtinen, J. 387
Spogliarich, R., see Rocchini, E. L313
Sugiyama, S., see Hayashi, H. 129
Suryanarayana, P., see Shashikala, K. 223
Toba, M., Mizukami, F., Niwa, S., Sano, T., Maeda, K., Annila, A. and Komppa, V.
Effect of the type of preparation on the properties of titania/silicas 277
Török, B., Pálinkó, I., Molnár, Á. and Bartók, M.
Ring enlargement and aromatization of propylcyclobutane over silica-supported Pt, Pd and Rh in hydrogen atmosphere 61
Touroude, R., see Maetz, Ph. 259
Vitulli, G., see Polizzi, C. 83
Yang, H., Khan, M.A. and Nicholas, K.M.
Chiral Pd-, Cu- and Ni-chelates and their utilities as catalysts in allylic acetoxylation of alkenes 319
Zhidomirov, G.M., see Filatov, M.J. 71

JOURNAL OF MOLECULAR CATALYSIS

Subject Index

acetone
Study of the Meerwein–Pondorff–Verley reaction between ethanol and acetone on various metal oxides 45
acetoxylation
Chiral Pd-, Cu- and Ni-chelates and their utilities as catalysts in allylic acetoxylation of alkenes 319
acid–base catalysis
Bifunctional acid–base catalysis by imidazole groups in enzyme mimics 161
active sites
Use of the methanol decomposition reaction for identifying surface species in Cu/Co-based catalysts 369
activity
Activity and selectivity of supported Rh complex catalyst in carbonylation of nitrobenzene 195
alcohols
Liquid-phase oxidation of alcohols by dioxygen using oxide-supported platinum catalysts 139
alkenes
Chiral Pd-, Cu- and Ni-chelates and their utilities as catalysts in allylic acetoxylation of alkenes 319
Is metallic palladium formed in Wacker oxidation of alkenes? 343
allyl alcohol
Hydroformylation of allyl alcohol catalysed by $(Rh(PPh_3)_3)^+$/montmorillonite: a kinetic study 187
allylic derivatives
Chiral Pd-, Cu- and Ni-chelates and their utilities as catalysts in allylic acetoxylation of alkenes 319
aminoarenes
Synthesis of aminoarenes in homogeneously catalyzed nitroarene – methyl formate reactions 149
aniline
New catalytic system for oxidative carbonylation of aniline 155
Synthesis of methyl *N*-phenyl carbamate by methoxycarbonylation of aniline with dimethyl carbonate using Pb compounds as catalysts 399
aromatization
Ring enlargement and aromatization of propylcyclobutane over silica-supported Pt, Pd and Rh in hydrogen atmosphere 61
Aspergillus niger
Study of the new electron transfer mediators in glucose oxidase catalysis 407
base
New catalytic system for oxidative carbonylation of aniline 155
bile salt stimulated enzyme
Bile-salt-stimulated human milk lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl] glycerol: solvent isotope effect 303
bimetallic catalysts
Preparation and characterization of copper based bimetallic catalysts 107
Polyol conversion into furanic derivatives on bimetallic catalysts; nature of the catalytic sites 119
5,6:11,12-bis(dithio)tetracene
Study of the new electron transfer mediators in glucose oxidase catalysis 407
carbamate derivatives
Synthesis of methyl *N*-phenyl carbamate by methoxycarbonylation of aniline with dimethyl carbonate using Pb compounds as catalysts 399
carbon
Thiophene desulfurization by Co/carbon catalysts synthesized by reaction of $Co(C_5H_5)_2$ and the carbon support 91
carbon dioxide
Fast and slow methanation pathways in hydrogenation of carbon dioxide on Fe–Mn oxide catalysts 353
carbon monoxide
New catalytic system for oxidative carbonylation of aniline 155
Role of readsorption during CO hydrogenation over cobalt model catalysts 387
carbonylation
Orthometalated ruthenium-complex-catalysed reductive carbonylation of nitroaromatics 19

Ruthenium catalyzed ethylene–methyl formate reactions. Synthesis of propanol and ketones 31
Activity and selectivity of supported Rh complex catalyst in carbonylation of nitrobenzene 195
carbonyl complexes
$Ru_3(CO)_{12}$/2,2′-bipyridine supported on inorganic carriers as 1-hexene hydroformylation catalysts 335
carbonyl sulfide
New catalytic system for oxidative carbonylation of aniline 155
chain transfer
Kinetics of chain transfer during ethylene polymerization with chromium oxide/silica catalyst 237
chiral chelates
Chiral Pd-, Cu- and Ni-chelates and their utilities as catalysts in allylic acetoxylation of alkenes 319
chiral complexes
Stereoselective oxidation of enantiomeric amines by a monoamine oxidase model of chiral iron(III) porphyrins 7
chromium
Kinetics of chain transfer during ethylene polymerization with chromium oxide/silica catalyst 237
cobalt
Quantum-chemical study of the four-electron catalytic oxidation of water to dioxygen in the presence of dinuclear and tetranuclear hydroxide complexes of cobalt(III) and iron(III): intermediates of the catalytic cycle and their relative energies 71
Selective olefin oxidation with cobalt phthalocyanine encapsulated in Y-zeolite 251
Use of the methanol decomposition reaction for identifying surface species in Cu/Co-based catalysts 369
Role of readsorption during CO hydrogenation over cobalt model catalysts 387
cobaltocene
Thiophene desulfurization by Co/carbon catalysts synthesized by reaction of $Co(C_5H_5)_2$ and the carbon support 91
complexing-agents
Effect of the type of preparation on the properties of titania/silicas 277
copper
Preparation and characterization of copper based bimetallic catalysts 107
Use of the methanol decomposition reaction for identifying surface species in Cu/Co-based catalysts 369
CS_2
New catalytic system for oxidative carbonylation of aniline 155
cyclodextrin
Bifunctional acid–base catalysis by imidazole groups in enzyme mimics 161
cyclodextrins
Catalytic hydrogenation of aromatic ketones in the presence of cyclodextrins L313
cyclohexene
Is metallic palladium formed in Wacker oxidation of alkenes? 343
decomposition
Use of the methanol decomposition reaction for identifying surface species in Cu/Co-based catalysts 369
dehydrogenation
Role of hydride phases in the catalytic activity of Zr_2Ni for the dehydrogenation of methanol 223
density functionals
The importance of sulphur–sulphur bonding in the hydrodesulphurization process of thiophene, using transition metal sulphide catalysts 207
desulphurization
Thiophene desulfurization by Co/carbon catalysts synthesized by reaction of $Co(C_5H_5)_2$ and the carbon support 91
deuterium
Mechanism of but-1-yne hydrogenation on platinum catalysts: deuterium tracer study. 259
1,6-dithiapyrene
Study of the new electron transfer mediators in glucose oxidase catalysis 407
electronic structure calculations
The importance of sulphur–sulphur bonding in the hydrodesulphurization process of thiophene, using transition metal sulphide catalysts 207
electron transfer
Study of the new electron transfer mediators in glucose oxidase catalysis 407
encapsulation
Selective olefin oxidation with cobalt phthalocyanine encapsulated in Y-zeolite 251
enolization
Bifunctional acid–base catalysis by imidazole groups in enzyme mimics 161
enzymic catalysis
Bile-salt-stimulated human milk lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl] glycerol: solvent isotope effect 303
epoxidation
Selective olefin oxidation with cobalt phthalocyanine encapsulated in Y-zeolite 251
ethanol
Study of the Meerwein–Pondorff–Verley reaction

between ethanol and acetone on various metal oxides 45
ethylene
Ruthenium catalyzed ethylene–methyl formate reactions. Synthesis of propanol and ketones 31
Kinetics of chain transfer during ethylene polymerization with chromium oxide/silica catalyst 237
furan derivatives
Polyol conversion into furanic derivatives on bimetallic catalysts; nature of the catalytic sites 119
glucose oxidase
Study of the new electron transfer mediators in glucose oxidase catalysis 407
gold
Preparation and characterization of copper based bimetallic catalysts 107
Polyol conversion into furanic derivatives on bimetallic catalysts; nature of the catalytic sites 119
heterodifunctional chelating ligands
Homogeneous hydrogenation of olefins catalyzed by rhodium(I) complexes of new heterodifunctional phosphorus–nitrogen chelating ligands 175
hexene
$Ru_3(CO)_{12}$/2,2′-bipyridine supported on inorganic carriers as 1-hexene hydroformylation catalysts 335
hexynes
Supported platinum atoms derived catalysts in the hydrosilylation of unsaturated substrates 83
high dispersion
Liquid-phase oxidation of alcohols by dioxygen using oxide-supported platinum catalysts 139
homogeneous catalysis
Synthesis of aminoarenes in homogeneously catalyzed nitroarene – methyl formate reactions 149
hydride phase
Role of hydride phases in the catalytic activity of Zr_2Ni for the dehydrogenation of methanol 223
hydrodesulphurization
The importance of sulphur–sulphur bonding in the hydrodesulphurization process of thiophene, using transition metal sulphide catalysts 207
hydroformylation
Selectivity in hydroformylation of 1-decene by homogeneous catalysis L1
Hydroformylation of allyl alcohol catalysed by $(Rh(PPh_3)_3)^+$/montmorillonite: a kinetic study 187
$Ru_3(CO)_{12}$/2,2′-bipyridine supported on inorganic carriers as 1-hexene hydroformylation catalysts 335
hydrogenation
Homogeneous hydrogenation of olefins catalyzed by rhodium(I) complexes of new heterodifunctional phosphorus–nitrogen chelating ligands 175
Mechanism of but-1-yne hydrogenation on platinum catalysts: deuterium tracer study. 259
Catalytic hydrogenation of aromatic ketones in the presence of cyclodextrins L313
Role of readsorption during CO hydrogenation over cobalt model catalysts 387
hydrolysis
Bifunctional acid–base catalysis by imidazole groups in enzyme mimics 161
Bile-salt-stimulated human milk lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl] glycerol: solvent isotope effect 303
hydrosilylation
Supported platinum atoms derived catalysts in the hydrosilylation of unsaturated substrates 83
hydroxo complexes
Quantum-chemical study of the four-electron catalytic oxidation of water to dioxygen in the presence of dinuclear and tetranuclear hydroxide complexes of cobalt(III) and iron(III): intermediates of the catalytic cycle and their relative energies 71
identification
Use of the methanol decomposition reaction for identifying surface species in Cu/Co-based catalysts 369
imidazole groups
Bifunctional acid–base catalysis by imidazole groups in enzyme mimics 161
inhibition
Hydroformylation of allyl alcohol catalysed by $(Rh(PPh_3)_3)^+$/montmorillonite: a kinetic study 187
intercalation
Hydroformylation of allyl alcohol catalysed by $(Rh(PPh_3)_3)^+$/montmorillonite: a kinetic study 187
intermetallic compounds
Role of hydride phases in the catalytic activity of Zr_2Ni for the dehydrogenation of methanol 223
iron
Stereoselective oxidation of enantiomeric amines by a monoamine oxidase model of chiral iron(III) porphyrins 7
Quantum-chemical study of the four-electron catalytic oxidation of water to dioxygen in the presence of dinuclear and tetranuclear hydroxide complexes of cobalt(III) and iron(III): intermediates of the catalytic cycle and their relative energies 71

Fast and slow methanation pathways in hydrogenation of carbon dioxide on Fe–Mn oxide catalysts 353
isoprene
Supported platinum atoms derived catalysts in the hydrosilylation of unsaturated substrates 83
ketones
Ruthenium catalyzed ethylene–methyl formate reactions. Synthesis of propanol and ketones 31
kinetics
Hydroformylation of allyl alcohol catalysed by $(Rh(PPh_3)_3)^+$/montmorillonite: a kinetic study 187
Kinetics of chain transfer during ethylene polymerization with chromium oxide/silica catalyst 237
lactate
An alloy phase of Pd_3Pb and the activity of Pb/Pd/C catalysts in the liquid-phase oxidation of sodium lactate to pyruvate 129
lanthanum
Fast and slow methanation pathways in hydrogenation of carbon dioxide on Fe–Mn oxide catalysts 353
leaching
Hydroformylation of allyl alcohol catalysed by $(Rh(PPh_3)_3)^+$/montmorillonite: a kinetic study 187
lead
An alloy phase of Pd_3Pb and the activity of Pb/Pd/C catalysts in the liquid-phase oxidation of sodium lactate to pyruvate 129
Synthesis of methyl *N*-phenyl carbamate by methoxycarbonylation of aniline with dimethyl carbonate using Pb compounds as catalysts 399
lipase
Bile-salt-stimulated human milk lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl] glycerol: solvent isotope effect 303
liquid phase
An alloy phase of Pd_3Pb and the activity of Pb/Pd/C catalysts in the liquid-phase oxidation of sodium lactate to pyruvate 129
Is metallic palladium formed in Wacker oxidation of alkenes? 343
low valence
Liquid-phase oxidation of alcohols by dioxygen using oxide-supported platinum catalysts 139
manganese
Fast and slow methanation pathways in hydrogenation of carbon dioxide on Fe–Mn oxide catalysts 353
mechanism
Mechanism of but-1-yne hydrogenation on platinum catalysts: deuterium tracer study. 259
Meerwein–Pondorff–Verley reaction
Study of the Meerwein–Pondorff–Verley reaction between ethanol and acetone on various metal oxides 45
Meldola's blue
Study of the new electron transfer mediators in glucose oxidase catalysis 407
metal oxide
Study of the Meerwein–Pondorff–Verley reaction between ethanol and acetone on various metal oxides 45
methanation
Fast and slow methanation pathways in hydrogenation of carbon dioxide on Fe–Mn oxide catalysts 353
methanol
New catalytic system for oxidative carbonylation of aniline 155
Role of hydride phases in the catalytic activity of Zr_2Ni for the dehydrogenation of methanol 223
Use of the methanol decomposition reaction for identifying surface species in Cu/Co-based catalysts 369
methoxycarbonylation
Synthesis of methyl *N*-phenyl carbamate by methoxycarbonylation of aniline with dimethyl carbonate using Pb compounds as catalysts 399
methylene blue
Study of the new electron transfer mediators in glucose oxidase catalysis 407
methylene green
Study of the new electron transfer mediators in glucose oxidase catalysis 407
methyl formate
Ruthenium catalyzed ethylene–methyl formate reactions. Synthesis of propanol and ketones 31
Synthesis of aminoarenes in homogeneously catalyzed nitroarene – methyl formate reactions 149
methyl-*N*-phenyl carbamate
New catalytic system for oxidative carbonylation of aniline 155
microwave spectroscopy
Mechanism of but-1-yne hydrogenation on platinum catalysts: deuterium tracer study. 259
monoamine oxidase
Stereoselective oxidation of enantiomeric amines by a monoamine oxidase model of chiral iron(III) porphyrins 7
montmorillonite
Hydroformylation of allyl alcohol catalysed by $(Rh(PPh_3)_3)^+$/montmorillonite: a kinetic study 187
nickel
Role of hydride phases in the catalytic activity of

Zr_2Ni for the dehydrogenation of methanol 223
nickelocene
Study of the new electron transfer mediators in glucose oxidase catalysis 407
nitroaromatics
Orthometalated ruthenium-complex-catalysed reductive carbonylation of nitroaromatics 19
nitrobenzene
Activity and selectivity of supported Rh complex catalyst in carbonylation of nitrobenzene 195
N,N'-diphenylurea
New catalytic system for oxidative carbonylation of aniline 155
N-phenylformamide
New catalytic system for oxidative carbonylation of aniline 155
olefins
Selectivity in hydroformylation of 1-decene by homogeneous catalysis L1
Homogeneous hydrogenation of olefins catalyzed by rhodium(I) complexes of new heterodifunctional phosphorus–nitrogen chelating ligands 175
Selective olefin oxidation with cobalt phthalocyanine encapsulated in Y-zeolite 251
orthometallated complexes
Orthometalated ruthenium-complex-catalysed reductive carbonylation of nitroaromatics 19
oxidation
Stereoselective oxidation of enantiomeric amines by a monoamine oxidase model of chiral iron(III) porphyrins 7
Quantum-chemical study of the four-electron catalytic oxidation of water to dioxygen in the presence of dinuclear and tetranuclear hydroxide complexes of cobalt(III) and iron(III): intermediates of the catalytic cycle and their relative energies 71
Liquid-phase oxidation of alcohols by dioxygen using oxide-supported platinum catalysts 139
Selective olefin oxidation with cobalt phthalocyanine encapsulated in Y-zeolite 251
Is metallic palladium formed in Wacker oxidation of alkenes? 343
oxidative carbonylation
New catalytic system for oxidative carbonylation of aniline 155
oxide catalyst
Fast and slow methanation pathways in hydrogenation of carbon dioxide on Fe–Mn oxide catalysts 353
oxygen
New catalytic system for oxidative carbonylation of aniline 155
palladium
Ruthenium catalyzed ethylene–methyl formate reactions. Synthesis of propanol and ketones 31
Ring enlargement and aromatization of propylcyclobutane over silica-supported Pt, Pd and Rh in hydrogen atmosphere 61
Polyol conversion into furanic derivatives on bimetallic catalysts; nature of the catalytic sites 119
An alloy phase of Pd_3Pb and the activity of Pb/Pd/C catalysts in the liquid-phase oxidation of sodium lactate to pyruvate 129
Chiral Pd-, Cu- and Ni-chelates and their utilities as catalysts in allylic acetoxylation of alkenes 319
Is metallic palladium formed in Wacker oxidation of alkenes? 343
phosphate esters
Bifunctional acid–base catalysis by imidazole groups in enzyme mimics 161
phosphorus–nitrogen ligands
Homogeneous hydrogenation of olefins catalyzed by rhodium(I) complexes of new heterodifunctional phosphorus–nitrogen chelating ligands 175
phthalocyanine
Selective olefin oxidation with cobalt phthalocyanine encapsulated in Y-zeolite 251
platinum
Ring enlargement and aromatization of propylcyclobutane over silica-supported Pt, Pd and Rh in hydrogen atmosphere 61
Supported platinum atoms derived catalysts in the hydrosilylation of unsaturated substrates 83
Preparation and characterization of copper based bimetallic catalysts 107
Polyol conversion into furanic derivatives on bimetallic catalysts; nature of the catalytic sites 119
Liquid-phase oxidation of alcohols by dioxygen using oxide-supported platinum catalysts 139
Mechanism of but-1-yne hydrogenation on platinum catalysts: deuterium tracer study. 259
polymerization
Kinetics of chain transfer during ethylene polymerization with chromium oxide/silica catalyst 237
polyol
Preparation and characterization of copper based bimetallic catalysts 107
polyols
Polyol conversion into furanic derivatives on bimetallic catalysts; nature of the catalytic sites 119
porphyrin complexes
Stereoselective oxidation of enantiomeric amines

by a monoamine oxidase model of chiral iron(III) porphyrins 7
p-phenylenediamine derivatives
Study of the new electron transfer mediators in glucose oxidase catalysis 407
propylcyclobutane
Ring enlargement and aromatization of propylcyclobutane over silica-supported Pt, Pd and Rh in hydrogen atmosphere 61
pyridines
$Ru_3(CO)_{12}$/2,2′-bipyridine supported on inorganic carriers as 1-hexene hydroformylation catalysts 335
pyruvate
An alloy phase of Pd_3Pb and the activity of Pb/Pd/C catalysts in the liquid-phase oxidation of sodium lactate to pyruvate 129
quantum-chemical calculations
Quantum-chemical study of the four-electron catalytic oxidation of water to dioxygen in the presence of dinuclear and tetranuclear hydroxide complexes of cobalt(III) and iron(III): intermediates of the catalytic cycle and their relative energies 71
reaction pathways
Fast and slow methanation pathways in hydrogenation of carbon dioxide on Fe–Mn oxide catalysts 353
readsorption
Role of readsorption during CO hydrogenation over cobalt model catalysts 387
recyclable catalyst
Liquid-phase oxidation of alcohols by dioxygen using oxide-supported platinum catalysts 139
reduction
Orthometalated ruthenium-complex-catalysed reductive carbonylation of nitroaromatics 19
Synthesis of aminoarenes in homogeneously catalyzed nitroarene – methyl formate reactions 149
rhodium
Ring enlargement and aromatization of propylcyclobutane over silica-supported Pt, Pd and Rh in hydrogen atmosphere 61
Homogeneous hydrogenation of olefins catalyzed by rhodium(I) complexes of new heterodifunctional phosphorus–nitrogen chelating ligands 175
Hydroformylation of allyl alcohol catalysed by $(Rh(PPh_3)_3)^+$/montmorillonite: a kinetic study 187
Activity and selectivity of supported Rh complex catalyst in carbonylation of nitrobenzene 195
Fast and slow methanation pathways in hydrogenation of carbon dioxide on Fe–Mn oxide catalysts 353
ribonuclease A mimics
Bifunctional acid–base catalysis by imidazole groups in enzyme mimics 161
ring enlargement
Ring enlargement and aromatization of propylcyclobutane over silica-supported Pt, Pd and Rh in hydrogen atmosphere 61
ruthenium
Orthometalated ruthenium-complex-catalysed reductive carbonylation of nitroaromatics 19
Ruthenium catalyzed ethylene–methyl formate reactions. Synthesis of propanol and ketones 31
Preparation and characterization of copper based bimetallic catalysts 107
Polyol conversion into furanic derivatives on bimetallic catalysts; nature of the catalytic sites 119
Synthesis of aminoarenes in homogeneously catalyzed nitroarene – methyl formate reactions 149
$Ru_3(CO)_{12}$/2,2′-bipyridine supported on inorganic carriers as 1-hexene hydroformylation catalysts 335
selectivity
Selectivity in hydroformylation of 1-decene by homogeneous catalysis L1
Activity and selectivity of supported Rh complex catalyst in carbonylation of nitrobenzene 195
Mechanism of but-1-yne hydrogenation on platinum catalysts: deuterium tracer study. 259
Catalytic hydrogenation of aromatic ketones in the presence of cyclodextrins L313
semi-hydrogenation
Mechanism of but-1-yne hydrogenation on platinum catalysts: deuterium tracer study. 259
silica
Ring enlargement and aromatization of propylcyclobutane over silica-supported Pt, Pd and Rh in hydrogen atmosphere 61
Kinetics of chain transfer during ethylene polymerization with chromium oxide/silica catalyst 237
Effect of the type of preparation on the properties of titania/silicas 277
sol–gel
Effect of the type of preparation on the properties of titania/silicas 277
solvent isotope effect
Bile-salt-stimulated human milk lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl] glycerol: solvent isotope effect 303
stereoselectivity
Stereoselective oxidation of enantiomeric amines by a monoamine oxidase model of chiral iron(III) porphyrins 7

sulfur
New catalytic system for oxidative carbonylation of aniline 155
sulphide catalysts
The importance of sulphur–sulphur bonding in the hydrodesulphurization process of thiophene, using transition metal sulphide catalysts 207
sulphur–sulphur bonding
The importance of sulphur–sulphur bonding in the hydrodesulphurization process of thiophene, using transition metal sulphide catalysts 207
supported catalysts
Ring enlargement and aromatization of propylcyclobutane over silica-supported Pt, Pd and Rh in hydrogen atmosphere 61
Supported platinum atoms derived catalysts in the hydrosilylation of unsaturated substrates 83
Thiophene desulfurization by Co/carbon catalysts synthesized by reaction of $Co(C_5H_5)_2$ and the carbon support 91
Liquid-phase oxidation of alcohols by dioxygen using oxide-supported platinum catalysts 139
Activity and selectivity of supported Rh complex catalyst in carbonylation of nitrobenzene 195
$Ru_3(CO)_{12}$/2,2′-bipyridine supported on inorganic carriers as 1-hexene hydroformylation catalysts 335
surface species
Use of the methanol decomposition reaction for identifying surface species in Cu/Co-based catalysts 369
tetrathiafulvalene
Study of the new electron transfer mediators in glucose oxidase catalysis 407
thiophene
Thiophene desulfurization by Co/carbon catalysts synthesized by reaction of $Co(C_5H_5)_2$ and the carbon support 91
titania
Effect of the type of preparation on the properties of titania/silicas 277
tracer studies
Mechanism of but-1-yne hydrogenation on platinum catalysts: deuterium tracer study. 259
triolein
Bile-salt-stimulated human milk lipase catalysed hydrolysis of 1,2,3-tri[(*cis*)-9-octadecenoyl] glycerol: solvent isotope effect 303
vanadium(V)
New catalytic system for oxidative carbonylation of aniline 155
water
Quantum-chemical study of the four-electron catalytic oxidation of water to dioxygen in the presence of dinuclear and tetranuclear hydroxide complexes of cobalt(III) and iron(III): intermediates of the catalytic cycle and their relative energies 71
X-ray diffraction
An alloy phase of Pd_3Pb and the activity of Pb/Pd/C catalysts in the liquid-phase oxidation of sodium lactate to pyruvate 129
X-ray photoelectron spectroscopy
An alloy phase of Pd_3Pb and the activity of Pb/Pd/C catalysts in the liquid-phase oxidation of sodium lactate to pyruvate 129
zirconium
Role of hydride phases in the catalytic activity of Zr_2Ni for the dehydrogenation of methanol 223
